1 CVS Task.....	2
-----------------	---

1. CVS Task

Use the CVS Task

CVS Task

Field	Required	Property	Description
Name	Yes		The task name
Connection/Host	Yes		The CVS connection type and host. Currently, only the pserver connection type is supported. If ssh access is required, then use an Exec Task and run the cvs command directly.
Port	No		If CVS is on a non standard port, enter it here. Otherwise, leave it blank.
Repository Path	Yes		The CVS repository path on the CVS host. This will look something like /home/cvs or /cvs.
Project	Yes		The project name in CVS to check out.
Tag	No		Use a specific tag or branch.
User	No		A valid user name to access the project.
Password	No		A valid password for the user name.
Directory	No		The working directory for the project. This will default to the value of project.path.

CVS

Enabled	Yes		Enable/Disable the task.
On Error	Yes		What to do if an error is detected.
